CI Solutions, Card Integrators Corporation is a software and systems integration group with over 20 years of successful product development, customer sales and support. We are a full service organization focused on card technology solutions for customers that value a particularly high level of service. We have teamed with many hardware manufactures to bring best in class solutions for Identification, Verification, Access Control and Student Attendance.

From integrated software for secure ID credentials to printer ribbons and cleaning supplies...

System Consultants- Our System Consultants help simplify complex card technology offerings to meet each organizations unique needs. We approach each and every opportunity as a consultation. Customers require solutions to meet their requirements and we understand that our best value is understanding our customers special situation.

Project Managers- Complex solutions that have easy user interfaces require planning. We approach every detail of cardware, software and hardware as important building blocks that will be added to our customers organization. How well these solutions fit is strategically part of our managed implementation. We say here at the CI that the best way to get somewhere is to have a road map. Our project managers make great maps.

Support Technicians- Creating software is easy, creating software that is powerful yet easy to use is our goal. We focus on simplified solutions to meet complex requirements. We also understand that customers need on-going help to ensure their investment is performing well after the initial placement. We are committed to knowledgeable, professional and responsive service. Our mutual success demands it.

Customer Service- The ID industry is filled with product distribution options. What you buy is somewhat important, but who you buy from can make a world of difference to your long term success. We understand the importance of accurate, detailed and timely processes to ensure a high level of performance. Our servant mentality is real. We are here to serve.

CI SOFTWARE SOLUTIONS

A powerful ID card issuance program with image capture, database connectivity, and card/report printing functions that allows easy operation even with advanced settings enabled. CI Badge is affordable yet feature rich. It allows unlimited card layouts with images, graphics, bar code, mag stripe encoding, RFID and smart card printing.

- Create unlimited card designs
- Create custom fields
- Print custom reports
- Support all barcode, mag stripe, proximity, and smart cards
- Maintain photo image database
- Connect to any ODBC-compliant database
- Easily import your current database
- Support driver license and fingerprint scans

CI Badge - Data Entry Screen

CI Visitor integrates with a driver license scanner for fast data and picture capture. In less than 5 seconds you have a visitor's personal information and photograph in your CI Badge Visitor database. Instantly produce a visitor pass that can range from a black & white temporary label to a color PVC access card for entry. All pass printing and transactions are stored and can be recalled for reporting.

- Scan driver's license or passport to auto-fill registration form
- Capture photo and biometrics
- Check visitor against internal watch lists
- Log time of entry and exit
- Generate evacuation report
- E-mail, print and export visitor logs

CI Visitor - Data Entry Screen

CIV allows customer to check record holders with a fast, easy look-up to answer to basic questions: Are you who you say you are? And are you Verified for entry? The system provides a rapid check in by scanning the member's key tag, membership card, or RFID (radio-frequency identification). If the member has forgotten their access card, the user can search for the member using alternative member information. CI Verify provides streamline access to check identity, verify access, confirm account, payment, and status information.

- Check in members
- Control gate or turnstile
- Verify account status
- Display member photo
- Verify number of visits
- Issue rental items
- Customize usage reports

CI Verify - Check-In Screen

CI Track is an enterprise level, time and activity software program for tracking all areas of student participation on campus. CI Track has a powerful reporting component to facilitate Positive Attendance reporting, curriculum impact and student success.

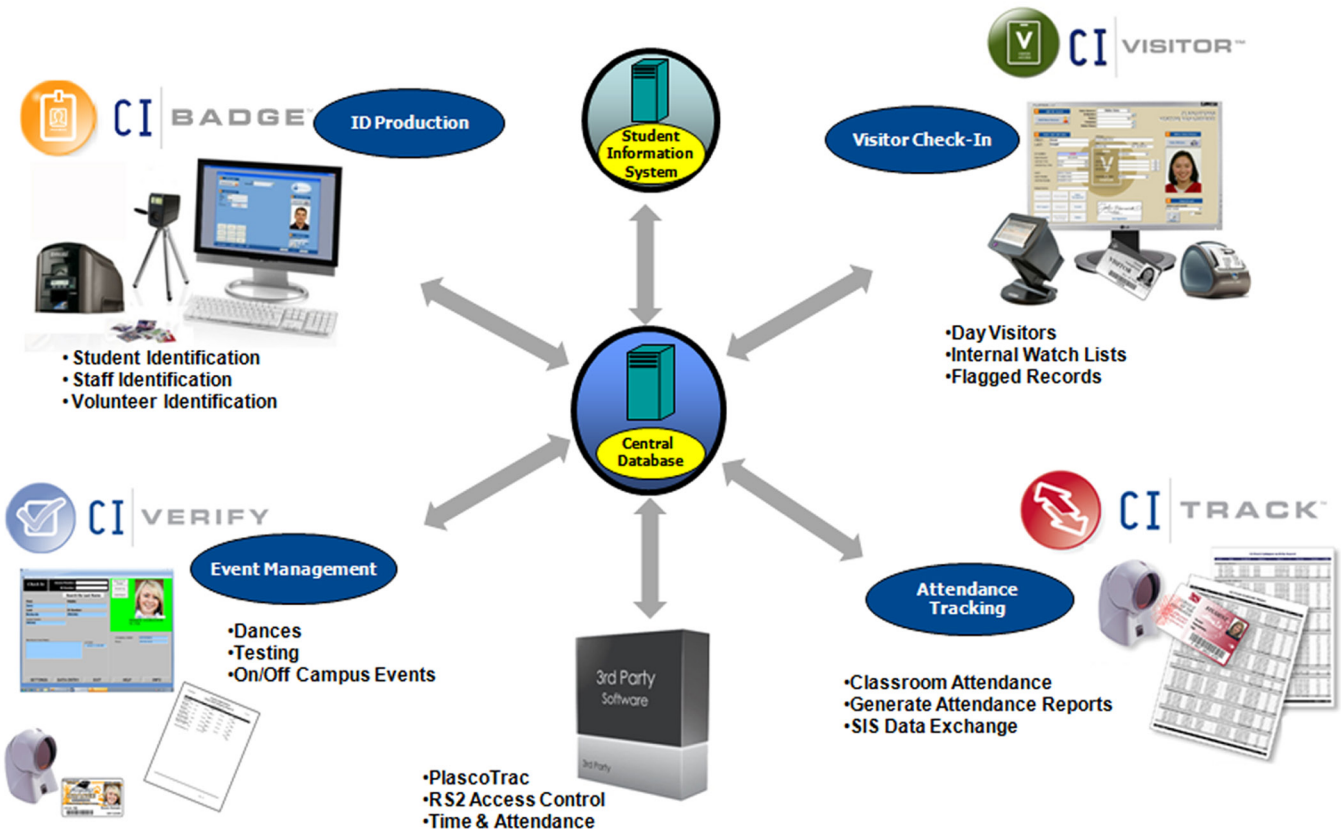

- *Maximize Student Tracking.* Ensures reporting of all student lab activity including number of visits and time expended on each activity resulting in Positive Attendance reimbursement to the college. Information can be used to evaluate student progress for early instructor intervention for improved student success.
- *Supports Distance Learning.* Students can complete lab activities via a web browser by logging on to CI Track through their remote-enabled campus server.
- *Automatic Report Generation.* Standard reports can be generated to support time calculations based on actual time credited time or 50-minute Carnegie Unit for accurate FTES reporting.
- *E-Reporting.* Reports can be emailed to individuals or groups that can be generated in real-time or pre-scheduled.
- *Student Information System Integration.* Includes built-in interfaces with Oracle® PeopleSoft, Ellucian™ (formerly Datatel & Sungard Higher Education), and Blackboard®.

The Campus Safety Suite is a multi-software solution that gives schools the power to identify and verify everyone on campus and school-sponsored off campus events.

- *CI Badge is the Suite's photo identification solution that identifies all students and staff on campus. It has the ability to print bar codes or QR codes and magnetic stripe encoding to integrate into the campus media center, lunch program and bus program.*
- *CI Visitor enables a campus to identify every visitor on campus. These visitors can include parents, vendors and substitutes. Using a driver license scanner, visitor information is uploaded and a visitor label is printed. An internal watch list can also be created to flag any unwanted visitors attempting to enter campus. CI Visitor eliminates the need for manual sign in sheets. The report module allows for creation of daily visitor logs.*
- *CI Verify will reduce lines by having students swipe a barcode to enter an on/off campus event. CI Verify will display if the student is approved to attend the specified event. Non-student participants are linked to the student escort for easy identification upon check-in.*

PRINTERS

AUTHORIZED RESELLER

EVOLIS PRINTERS

Evolis designs, manufactures, and markets a comprehensive range of plastic card printing solutions. These card printers are fitted with options for graphic, magnetic and RFID personalization of all kind of cards and badges. Evolis aims at making plastic card printing widely available and affordable by offering simple, on-demand and customized printing solutions that bring quality to the largest scope of business users.

CAMERAS

VALCAM PTZ ID CAMERA

The ValCam camera with pan, tilt, and zoom is the absolute best solution possible to allow full software control of pan, tilt, and zoom features.

- Powerful high-intensity flash for capturing the perfect image
- Auto-focus
- 18:1 optical zoom or 72:1 digital zoom with software
- Pan and tilt control

VALCAM ZOOM+ ID CAMERA

Specifically designed for photo ID applications, the VALCam Zoom camera creates crisp, high quality ID badge photos. Unlike other digital cameras, the VALCam uses CCD sensors with few pixels but with higher quality, which is ideal for printing high quality photos on plastic cards.

- Zoom via mouse or keyboard
- Auto-focus
- 18:1 optical zoom or 72:1 digital zoom with software
- High intensity flash with red eye reduction

TRANSCAM FLASH ID CAMERA

Combining the superior image quality of a high resolution digital camera with a live video capture software interface makes capturing images for ID badges faster and easier than ever.

- Optical and digital focus
- Focus, expose and mode camera settings controlled from computer
- Face recognition on the live image in the preview window
- Face crop on the captured image and cropped image enhancement

LOGITECH QUICK CAM PRO 9000

Features auto-focus and brightness adjustment for sharp and fluid video. Shoots HD video with 2-megapixel sensor capture, and takes detailed 16 x 9 wide screen videos. Captures up to 8-megapixel photos.

MICROSOFT LIFECAM

Features TrueColor technology with face tracking, HD video recording, and auto-focus. Camera is Microsoft Windows 8 enabled and has the option for a tripod attachment.

CREDENTIAL CAM

Camera captures full HD true 2.0 megapixel video with many extra features such as, auto zoom, face finder, manual focus, auto exposure, and automatic color compensation with brightness adjustment. The 5 layer lens allows for video resolution up to 5 megapixels and 8 megapixel still image resolution.

- Desktop stand
- LCD screen clip and notebook clip
- Built-in digital mic

KBW-BCLASER

SINGLE LINE BARCODE SCANNER

This single-line laser barcode scanner aggressive scan performance on virtually all linear barcodes, including poor quality and damaged codes. Updated object detection, and automatic in-stand detection and configuration enable class-leading presentation scanning that maximizes throughput. Superior scan performance matched with a reliable design combine to provide a versatile linear scanning solution suitable for a wide variety of applications.

OMNI-DIRECTIONAL BARCODE SCANNER

This barcode scanner utilizes holographic technology to precisely focus the scanner's laser and therefore increase performance and efficiency. Because of its multi-directional capability, a bar code can quickly be read when held up to the reader in any direction. It is perfect for retail applications where counter space is at a premium and its unique contoured design allows it to be picked up to scan large, bulky items.

KBW-BCLASEOMNI

2-D BARCODE SCANNER

IDBA-6641LR8

The 2-D barcode scanner has several major advantages over single-line laser scanners and linear imagers by providing full omni-directional reading of standard 1D symbologies, as well as the ability to read bar codes off of mobile phone screens including tradition barcodes and QR codes.

DRIVER LICENSE SCANNER

The driver license scanner extracts the full card image, face image, signature image and full text data of the ID Card using a 3 mega-pixel camera built into its base to scan high quality 600dpi digital images of ID cards, populating the text into appropriate fields within 2-3 seconds, into the photo ID software. The driver license scanner recognizes driver licenses and state ID cards from all 50 states as well as selected international identification cards.

CSS SNAPSHELL

MAGNETIC STRIPE READER

KBW-MS

An easy-to-install device that can read information stored on a high- or low-coercivity mag stripe. Magnetic stripe readers are widely used in access control applications. A simple, reliable solution for card-swiping, magnetic stripe readers are compatible with most ID software programs.

PROXIMITY CARD READER

Commonly used for access control, proximity card readers are easy-to-install devices that can read information stored on proximity or contactless smart cards. Proximity card readers are a fast, simple, and reliable solution for reading cards.

PROX READER

SIGNATURE CAPTURE PAD

SIGNATURE-3

This device captures digital signatures and imports into most ID software and security programs. Available with a backlit LCD display so users can see "electronic ink" as they sign and data screens to read agreements and check preferred options.

FINGERPRINT SCANNER

Fingerprint scanners provide high-tech biometrics at an affordable price for any high-security application. Fingerprints are an accurate, reliable method of identification and verification for various applications, such as hospital patient records or correctional facility access control.

Why Would I Choose A Custom Lanyard?

Custom lanyards help build brand awareness or promote your organization's message. Lanyards are used to carry IDs, keys, pens, eye glasses, flash drives, cell phones, cameras, etc. Custom lanyards also make great promotional giveaways or souvenirs for your event.

Design a Custom Lanyard in Four Easy Steps:

1. Select your Material

Standard Material Types

Flat Braid
Most economical choice.

OptiWeave™
Tubular Flexible Polyester. Great for silk screen imprinting.

MicroWeave™ Most Popular!
Ribbed Polyester Material. Great print quality and economical.

UltraWeave™
Smooth, satin-like polyester material. Superior base for imprinting.

Woven-In
A polyester material in which the design is woven into the fabric

Specialty Material Types

Bamboo
Comprised of rayon fibers that are made from Bamboo. Very soft to the touch.

Organic Cotton
Made with 100% organic cotton which is grown without the use of harmful chemicals or pesticides.

Anti-Microbial
Polyester material which contains Nanoparticles that coat the material fibers to prevent the growth of germs.

Recycled P.E.T.
Made from 100% recycled polyester. (80% Pre-Consumer & 20% Post-Consumer waste)

This is just a sampling of our custom lanyard offering. Turn the page for many more options and end fittings!

Custom Lanyards ship in 10 days.
(after proof approval)
Need it faster? Call for details.

2. Select your Imprint Method

Standard Imprinting Methods

Silk Screen
The most economical imprinting method. You can silk screen on almost every material with the exception of Woven-In. Allows up to a 3 color imprint.

Dye Sublimation (a.k.a. Dye-Sub) Color is dyed into the fabric. Ideal for intricate designs. Endless color options and shows gradient detail. For best results, chose UltraWeave™ fabric.

Woven-In
Design is woven into the fabric. The tight weave allows for a crisp and clean imprint. You can choose up to 12 thread colors.

3. Select your Width

Width Options

There are four different width options depending on which material you choose. The most popular width is 5/8".

Other Materials & Available Widths:

Bamboo: 3/8" & 5/8"
Woven In: 5/8", 3/4" & 1"
Flat Braid: 3/8"
OptiWeave™: 5/8"

All other material types come in all four widths.

4. Select your Attachment

Attachment Options

An attachment is the component on the end of the lanyard that holds ID cards, keys, cell phones, etc...Here are some examples of standard lanyard attachments.

Safety Breakaway

A safety breakaway disconnects when pulled to prevent choking. Most schools and hospitals require breakaways.

Specialty Attachments

such as the DTACH, are also available. Add a DTACH for more versatility.

See Pages 5-12 for more details and options for Custom Lanyards!

Custom Lanyards are a great way to promote your business, organization or cause!

High-Quality Printing Displays Superb Detail and Color!

DYE-SUBLIMATED LANYARDS

Dye-Sublimated lanyards are printed using pantone color match. This process ensures that the artwork provided will match the printed lanyard, meet branding guidelines for many logos and keep color consistency with repeat orders. Please provide PMS colors for artwork when placing an order. A full-color, digital proof will be provided.

MOQ: 100

VINYL EVENT HOLDERS WITH 2 SLOT HOLES

Ideal for large meetings or conventions, these vinyl event holders contain two slot holes to allow for easy attachment using a lanyard or chain. The two slots provide more stability while displaying the credential, keeping it straight and preventing flipping. Flexible vinyl keeps your credential safe from dirt, water, and other damage. Holders have a mil thickness of .010" in front and .030" in back. **MOQ: 100**

Shielded Badge Holders

CardProtectors™ 1-CARD OPEN FACE RIGID SHIELDED HOLDER

This rigid holder protects a smart card from unauthorized data theft known as “skimming” while still displaying the face of your card and allowing for easy removal. Semi-rigid ABS holder protects 13.56 MHz RFID technology smart cards including MIFARE, iClass, PIV, CAC, TWIC and FRAC cards. Card easily slides in and locks in place for a tight fit. Meets BAA (Buy America) and TAA (Trade Agreement) Acts.

MOQ: 50

Industry Standard Smart Cards

UBand™ Contactless Silicone Wristband

NEW!

UBand™

UBand™ is a new contactless technology solution that is ideal for colleges and universities, combining multi-faceted MIFARE™ technology with the convenience and flexibility of a silicone wristband.

- **Wearability** - Unlike cards, which need to be carried in a pocket or on an attachment, UBand remains attached to the user naturally, increasing the likelihood of use while decreasing the likelihood of loss or theft.
- **Durability** - UBand is waterproof, sweatproof and can stand up to the rigors and wear and tear of campus life.
- **Flexibility** - UBand's flexibility is two-fold: material and usage. UBand's silicone rubber construction allows the band to stretch around the hand for easy, comfortable removal. MIFARE technology allows UBand to be customized to whatever uses a campus needs, including access, payments and more. Include the features you need and leave out those you don't.
- **Customizability** - 20 color options make it easy to find one to suit any college or university, while three different wrist sizes (6", 7", 8") mean there is a fit for everyone. With custom printing available in emboss, deboss, or silk screen, it's simple to make the UBand unique.

AVAILABLE COLORS

Actual wristband colors may vary, especially day glow colors.

UBand™ Technical Specifications

Chip Type:	MIFARE 1K
Operating Frequency:	13.56 MHz

VISITOR MANAGEMENT: BEST PRACTICES FOR SAFETY, SECURITY AND SUCCESS

In today's unsure times, your organization faces a myriad of potential threats: crime, vandalism, industrial espionage, global terrorism, and workplace violence, among others. The security of your employees and property are at risk every day – and it all begins at your front door.

Now more than ever, it's vitally important to have an effective Visitor Management system that will keep the wrong people out – and create a smooth, professional experience for your welcomed visitors.

Why is a Visitor Management System Important?

1 You know who is in your facility - at a moment's notice.

- Access to accurate, real-time records of non-staff personnel
- Seamless visitor documentation and an easy-to-access audit trail

2 You're prepared for visitors who may not be your friends.

- Improves the overall security of your personnel and property
- Ensures unauthorized visitors are not left unsupervised with your assets (VISITOR – Escort Required)
- Creates a permanent record of meetings, dates and attendees for intellectual property disputes

3 You can safeguard all on-site personnel and visitors (and your regulatory compliance, too).

- In case of emergency, all staff and visitors can be marshaled to a safe area
- Ensures compliance with internal policies, occupational health and safety regulations, and government regulations (specific industries)

4 You can make a powerful first impression with your visitors.

- Enhances your corporate image with a professional-looking system and badges
- Creates an efficient sign-in process (and eliminates long lines in your lobby!)
- Improves productivity and eliminates human errors

VISITOR MANAGEMENT SOLUTIONS

Your trusted provider for Visitor Management software, supplies and badges

Your organization has its own unique Visitor Management needs, and we're here to help you find the exact solution that's right for you.

We offer a wide range of Visitor Management products that can help you keep your facilities secure, safe, and professional from the moment your visitors walk in the door.

Call us today and let us help you find a Visitor Management solution that meets your budget and the needs of your facilities!

Time-Sensitive Expiring Wristbands

VISITOR BADGE LOG BOOKS

Easy, cost-effective solution for recording and badging your visitors

The TEMPbadge® Visitor Badge Log Book is Visitor Management, simplified! This innovative sign-in system allows you to keep a record of your visitors and issue them a self-expiring visitor badge – all in one easy step!

Confidential Visitor Documentation.

When a badge is filled out, a duplicate copy is recorded (which cannot be seen by future visitors).

Self-Expiring Visitor Badges.

For added security, the badge will display a red-colored “VOID” after the visitor has been on site for the allotted time.

Easy-to-Use, Low-Cost Solution.

This simple sign-in system can serve as a complete Visitor Management solution without any extra equipment or software!

Use our in-stock version (shown below) or create your own custom version with your logo, name, etc.

Customize It!

Call us today to start designing a Visitor Badge Log Book with your own custom graphics and text.

ONEstep All you need, pre-assembled in ONE badge!

Expired

We can also use your custom logo
as the design that will bleed through
to signify an expired badge!

Two-Part Expiring Products

TIMEToken® AND TIMEspot® INDICATOR BADGES

A low-cost solution for implementing self-expiring badges

- Pre-printed badges available in 1" x 2" bar area or .75" circular grid area
- Apply a TIMEToken® or TIMEspot® indicator atop the pre-printed area to begin expiration process
- Expiration indicators prevent unauthorized reuse of badges
- Badges available in a variety of adhesive or clip-on styles
- Customization options available for badges and indicators

TIMEBand® EXPIRING WRISTBANDS

Self-expiring wristbands for professional indoor event control

- Tear-proof, stretch-resistant wristbands with color-changing expiring areas
- Automatically activates when attached on wrist
- Changes color in one day to prevent reuse
- For indoor, climate controlled events

TEMPbadge® BP4 DESKTOP PRINTER

Simple, compact, reliable direct thermal printer. Perfect for printing visitor badges, retail labels and tags, and more. Great for many other small, temporary labeling applications. Includes 3-Year Limited Warranty.

- Simple and economical 4" direct thermal printer
- Small, space-saving design
- Standard USB 2.0, serial port and Ethernet connections
- Auto language emulations: EZPL, GEPL and GZPL
- Print Speed: 4 IPS (102 mm/s)
- Print Width: 4.25" (108 mm)

NEW!

P9050

Color change appears so that the badge cannot be reused!

EXPIRING SCHOOL BADGES

Know who's walking your halls with no need to worry about unauthorized reuse of uncollected badges. Designed specifically for schools to prevent tampering of personal information. Choose from manual printed or direct thermal printed with half-day (4-hour) or full-day (8-hour) expiration.

Lead Time

Silk Screen, Dye Sublimated, and Woven: 10 business days

Note: Indicates the estimated lead time following proof approval.

Non-standard orders require additional processing time.

Packaging

Lanyards are bundled in quantities of 100. Additional charges may apply for other quantities or special requests. Call for quote.

Damaged Shipments

All merchandise is inspected, weighed, and carefully packed for shipment before leaving any of our warehouses. The freight company accepts liability when the shipment leaves our facility. Upon delivery of your shipment, promptly check the number and condition of cartons against the Bill of Lading totals before signing the freight Bill of Lading.

If damage or loss is discovered – either visible or concealed – you must file a claim with the freight carrier within 14 days of the delivery date.

Lead Time

1-2 weeks for in-stock badge reels

Indicates the estimated lead time following receipt of approval of artwork proof. Lead time varies depending upon the number of colors and artwork.

Set-Up Charges - a set-up charge may apply to orders. Call for details.

Rush Charges - Additional charges may apply. Call for details.

Cancellation

Orders may be subject to a cancellation charge to compensate for any costs incurred prior to cancellation (i.e. artwork charges, printing plates, etc.).

Artwork

Modifications to artwork will be quoted on a per order basis.

A minimum charge applies. (No photocopies or faxes.)

The following computer files are acceptable:

Adobe Illustrator version 6.0 or less - all fonts converted to "OUTLINES" and saved as an .ai or .eps file.

Adobe Photoshop version 6.0 or less - files saved as .tiff, .bmp, .jpg, .psd or .gif - minimum DPI 150 - logos from websites are NOT acceptable.

Adobe InDesign version 6.0 or less - all fonts converted to OUTLINES and package the links when sending the file. Please specify the name and type of the files being sent.

Please DO NOT embed files in a Microsoft Word® file. Also include a color copy for color breakdown only. Pre-production custom-imprinted samples are available for an additional charge.

Logos, Trademarks or Designs shown do not imply any endorsement by their owner but are simply to exhibit factory printing capabilities.
